Replacement of PCB C300 CPU
Converter Test Kit OPTIMUS
Measuring chambers 8 mm
NICOL X-Ray Beam Limiting Device
Bucky Unit INALFA

In order to receive Philips Medical Integrated Security Tool (IST)
authorization/permissions, you must send an e-mail to Coop_Helpdesk@philips.com.
In the e-mail, you need to explain that you are in the US Army. Be sure to list
all the equipment you are required to support. The Coop Help Desk will then
create an IST account with your user profile including appropriate permissions
to support the equipment you indicated in the e-mail. Once the account has been
created, you must load the IST program on your laptop. Philips Help Desk will
supply you with a link to download the latest version. The
authorization/permissions will only last for 30 days. In order to keep the
authorization/permissions current, you must connect your laptop to the internet.
The program will automatically update itself. Along with the IST
authorization/permissions, you will also have access to the Philips Incenter Web
Site (http://incenter.medical.philips.com/) where you can download service
manuals, operator's manuals, field change orders (FCO), and updates for all of
Philips Medical equipment. Depending on the type of Philips equipment being
serviced, additional programs may need to be downloaded and installed on your
laptop. You can also request a Media-Pack from Philips. This CD/DVD Disc Pack
includes all the service, operators, FCO, and training documentation for all of
Philips Equipment. You can receive this by sending an e-mail to Philips
(InCenter.Media@philips.com) and requesting a Media Pack (list all the equipment
you are required to support).
